* **Note:** Working pressure decreases as temperature increases.

Construction: Non reinforced clear vinyl tubing. Cover and tube are compounded from Non-toxic PVC ingredients.

Features: The extreme clarity makes it most suitable for applications where visibility of flow is important. Easy to handle, good transparency, smooth bore, self extinguishing, non-marking.

Recommended For: Tubing in laboratories, air & water lines, de-ionized water lines, refrigeration drainage, ice making machines, bottling plants, beverage dispenser units.

Temperature Range: +25°F to 150°F

Lengths: Standard lengths, also cut and/or coupled to individual customer requirements.

* **Note:** Also available in FDA &/or USDA approved hose. Please specify on quotation/purchase order.
